

Concord Park

Tennessee

1:5600 - Scale Topographic Trail Map

Compiled from USGS 1:24000 topographic maps and aerial photographs. Trail data was collected using a GPS receiver and a mountain bike.

Projection and Latitude/Longitude grid ticks based on Tennessee State Plane Coordinates North American Datum, 1983

Share the trail

Multiple use trails are successful when users cooperate and follow established guidelines. Conflicts may be avoided by showing courtesy to each other and developing an ethic by which all users work together to share the trail.

All users

Stay on designated trails.
Avoid trail use in wet conditions.
Leave no trace.
Get involved. Volunteer some of your time to trail maintenance or cleanup.

Hikers

Keep pets leashed and under control.

Bikers

Control your speed.
Avoid skidding – skidding shows poor form, sloppy technique, and causes erosion.
Wear a helmet.
Carry a first aid kit and tools. At least a patch kit, pump, and chain tool.
Carry water and snacks.

Encountering other bikers

Downhill riders should yield to uphill riders.
Be considerate of novices and family groups.

Bikers encountering hikers

Bikers yield to all other trail users.
A friendly greeting makes a positive impression.
Announce your presence when overtaking hikers.

Equestrians and motorized vehicles are not allowed.

Second edition, OCT2003
Produced by Chris Pyle, Mountain Biker and GIS student at Pellissippi State Technical Community College.
